**Designation of Sirjan as "WCC-World Craft City for Kilim"**

World Crafts Council received an application for the title of "World Craft City for Kilim (weaving)" from Sirjan, Iran in 2017. After the evaluation had been authorized by WCC Presidency, the evaluation reports of the Jurors were passed on to the WCC Executive Board who decided to designate the city of Sirjan as "World Craft City for Kilim (weaving)".

**Sirjan Kilim** is well known in the local, regional, national and international markets. It is a rural and tribal handicraft mostly woven by women. The most important technique is Shiriki-peech twisted weaving. The raw materials are sourced locally. In addition to the local bazaar with 23 shops, Kilim is also distributed for sale in bazaars across Iran.

Training is often informal in domestic settings, where the skills are transmitted from generation to generation. Free training is also offered for underprivileged women and, specifically, for children. Formal education is newly introduced. Students are involved in the research into motifs which are quite diversified. There is innovation in product design, including tissue box covers, cushion covers, tablecloths, etc.

There are many workshops, both formal and domestic. This included an impressive new workshop established by young university graduates. There is also a large cooperative that provided work for **800 weavers**. Specialized Kilim fairs are organized locally and in Tehran, where Kilim is broadly promoted.

Sirjan is expected to fulfill its commitment to the title of World Craft City, to expand its international exchanges, work and communicate with other cities of the Crafts City network to cooperate in providing a common platform for the world craftspeople.

**Congratulations to Sirjan for being designated as WCC-World Craft City for Kilim.**

  
Rosy Greenlees
